Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Reopening of Prosecution

Prosecution on the merits of this application is reopened on claims 12 and 16 considered unpatentable for the reasons indicated below: Upon reconsideration, claims 12 and 16 are considered to be unpatentable in view of the prior art to Doumit (U.S. Patent No. 6,147,613).

Applicant is advised that the Notice of Allowance mailed is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Doumit (U.S. Patent No. 6,147,613). The patent to Doumit discloses an apparatus for detecting and preventing leaks in a property comprising one or more sensor units (R,

Art Unit: 3753

H, P), a base unit (20) in communication with the sender units, wherein the base unit (20) includes a corresponding multicolored light emitting diode (LED) for each sender unit, col. 6, lines 25-36 and lines 53-65. The base unit lacks being in communication with a main shutoff valve so that the fluid flow to the devices can be stopped upon the detection of a fluid leak. Doumit teaches that it is well known in the art to provide a leak detection system in communication with a main shutoff valve so that the supply of water can be shutoff upon the detection of a leak; see col. 1, lines 55-59 and col. 2, lines 8-12. In view of this teaching, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the system of Doumit to include having the base unit of Doumit in communication with a main shutoff valve, such as an electrical solenoid valve commonly used in residences, so that the main water supply can be shutoff upon the detection of a fluid leak to avoid water damage to the premises.

Allowable Subject Matter

Claims 1-5 and 8-11 are allowed.

Claims 13-15 and 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
